March 2008

Dear Valued Customer,

I am pleased to inform you that we have made ordering from Commanding Imaging Products, Inc. even easier this year. One change that you will notice is that we have gone to single price columns for our items this year with the exception of paper rolls. We received input as to our ordering process and we believe this change will benefit you this year.

**When you get a moment, please access our company website:**  
[www.commanderimaging.com](http://www.commanderimaging.com)

**Our website has the following features:**

- **Comprehensive product reference**
- **Current price list**
- **Cross reference feature enabling you to locate hard to find items**
- **Many other features**

As you have experienced rising costs in your business operations, we too have encountered spiraling costs of our own which include but not limited to raw materials and labor. Whenever possible we have absorbed these costs without having to increase prices to our customers. However, as 2008 began we reviewed our pricing and have seen the need to raise prices accordingly. On average, we have increased prices on most of the product lines a modest 3.5 to 5%. I would hope that you understand our need to raise prices this year.

These new prices will become effective on March 31, 2008. In the meantime, this is an opportunity for you and your customers to stock up on your high use items before the new prices go into effect.

I trust that you will enjoy the “one price fits all” pricing this year. We look forward to working with you and growing your imaging supplies business in 2008.

Sincerely,

Commander Imaging Products, Inc.
